Industrial Visit to : V2 Aqua, MIDC, Amravati

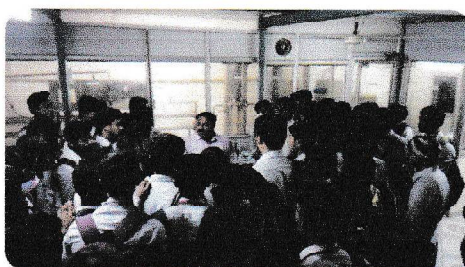

Date: 15.09.2017

As a part of curriculum every year department of chemistry visit nearby industry. This year tour was organized for Industrial visit to Mineral Water Plant Aqua V2.

The Manager welcomes us all and provides information of each and every step of the process and the processed mineral water is checked regularly through different test such as TDS check, microbial test for quality control. Total 91 Students with staff members involved in understanding various steps in the purification process.

The industry got ISO9002-2001 certification and certified Quality water. The supply of this water is for drinking purpose to nearby locality.

Students were well acquainted with the facts and satisfied with Industrial Visit.
